

Expand safely into new international markets with MCP+

Travel businesses must make it as easy and efficient as possible for customers to pay in their local currency, without creating undue exposure to currency fluctuations and risk potential cost implications.

MCP+ (Multi-Currency Pricing + Guaranteed Rates)

Travel Businesses have typically turned to forward contracts to mitigate potential risks but it's a costly, inaccurate and sometimes complicated process. Equiniti International Payments' MCP+ automatically links the value of every international consumer purchase with the value owed by the travel business to its respective supplier. This technology removes the need for forwards and provides organisations with a tool that can micro-hedge risk on every sale in real-time:

- Expand into new countries using prices displayed in local currency
- Eliminate FX risk
- Increase profits and customer loyalty
- Lock in a profit margin on every customer purchase
- No FX margin to pay
- No need to hedge 'ad hoc', predict FX flows or try to second guess currency movements

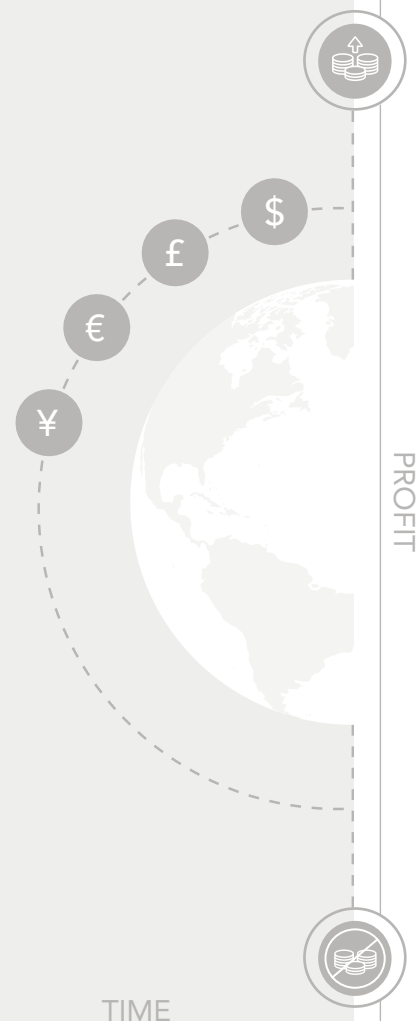

Delivered via our in house developed platform and utilising a simple set of API's, MCP+ automates your foreign currency hedging ensuring you grow your business while protecting yourself with minimum effort and no manual intervention.
