

Streamline the investigator payments process, utilising the capabilities of an innovative global payments solution

EQ Global combines innovative technology and a global banking network with a legacy dating back to 1836. We deliver payments into 180 countries and 130 currencies via our investigator and employee global payments platform; PayFac.

BRING EFFICIENCIES TO INVESTIGATOR PAYMENTS

Global, flexible, secure

EQ Global works with you on the payment process to include holdbacks, split payments and to factor in corporate withholding taxes which is applicable for specific countries. The goal is to optimise the funding currencies and where possible, take the most cost-effective payment process.

REDUCE

Duplication of data entry or formatting necessary to complete a payment through integration between EDC, CTMS and payments.

Over-funding of client accounts, to just in time funding to make the clinical payments for specific studies and/or pharma companies.

Payment cycle time to improve the satisfaction of the investigators and delivering accurate payment notifications.

IMPROVE

Controls, role segregation and SOX reporting.

Accuracy of payments, ensuring there is an invoice matching process before payment execution.

WE DELIVER
PAYMENTS INTO

180
COUNTRIES
